ABOUT THE COLLEGE

SCVB Govt. College Palampur, a co-educational institute, was established in 1995 in the splendid Dhauladhars. We offer a broad curriculum and a range of opportunities for all our students to excel in academic, creative, social, cultural, sporting, and community endeavours. The motto of SCVB Government College, Palampur, "Tamso Ma Jyotirgamaya," from the Brihad Aranyaka Upanishad, means "Lead me from darkness to light," and inspires both students and teachers to attain real, true, universal, and constructive knowledge in the world. Our college is covered by the University Grant Commission (UGC) under 2f and 12B and recently notified as an Utkrith Mahavidyalaya (a step towards excellence). With an extensive campus, professionally competent faculty members, a spacious library, well-equipped computer labs with Internet and wi-fi connectivity, a good sports facility, a host of extracurricular activities, 2 NSS units, 1 NCC unit each for boys and girls, and Rovers and Rangers, we at SCVB Government Colleges are committed to working for the overall development of the students. The College strives to impart holistic education and promote the overall development of our students in the moral, physical, and intellectual realms to craft their success and for a towering personality.

ABOUT THE CONFERENCE

'Transformations for Sustainable Development in India' Environmental sustainability encompasses the responsibility to conserve natural resources and protect global ecosystems to support health and wellbeing of people. The theme focuses on maintaining and sustaining the quality of our planet by avoiding the depletion of natural resources and taking drastic steps in agriculture, forestry and energy to build up a healthy environment. Projects and decisions should be taken with long-term benefits in mind, leading to economic sustainability.

Sustainability in the environment is an extremely urgent and universal issue. We can no longer put off our efforts to fight the climate crisis. The challenge of sustainable transformation in economies and businesses is balancing the need while making changes to reach sustainability ambitions. Social sustainability has a pivotal role in improving society's health and well-being by working on central elements like equity, diversity, social cohesion, quality of life, democracy, and governance. A better world is possible if we sincerely work on these pillars and form a sustainable future. While the benefits of past transformations, such as the Green Revolution, took decades to emerge, the transformation to sustainable development has a much shorter time frame. It proposes reframing and re-prioritizing the relationships between the economy, society, and environment through transformations. This Conference would examine many critical determinants of the relationships between these dimensions of sustainable development as targets for transformations to sustainable inclusive development in India, for which we are committed.

CONFERENCE THRUST AREAS

The major areas included (but not restricted to these topics only) in this conference are:

- Environmental Sustainability
- Global Warming and Climate change
- Innovation and Technology
- Economic, Financial & Operational Sustainability
- Relationships between the economy, society and environment through transformations
- Internet and Artificial Intelligence in sustainable development
- Biodiversity and its Management
- Role of women in Sustainable Development in India
