Disaster Management Committee

Report on Drop, Cover, and Hold Practice

To create awareness and preparedness among students and staff, a **Drop, Cover, and Hold practice** was conducted at SCVB Government College, Palampur. On the announcement of the earthquake signal, students took protective positions inside their classrooms by dropping to the ground, taking cover under desks or safe spaces, and holding their positions until the signal was over.

This exercise was carried out to familiarize the college community with the first and most essential response during earthquake tremors. **Students** participated in the activity. The practice was organized by the **Disaster Management Committee** under the supervision of **Principal Prof. Pankaj Sood**.

The drill was successful in sensitizing students and staff about the importance of quick protective actions during earthquakes and enhanced their confidence in dealing with such emergencies.
