Subject: Approval Feature for re-admitted students of 2nd and 3rd year for filling examination form of re-admitted students of 2nd and 3rd year

Dear Sir/Madam

A new feature has been provided to identify the students of 2nd and 3rd year who have failed and taken re-admission in the college under Annual System UG, at their college login ids as "Student re-admission for fail (Annual)".

The steps for using this feature are as follows:

1. Colleges have to click in the checkbox provided against students roll number, so that they can fill a fresh examination form within time.
2. Please select only those students who have taken re-admission in the college.
3. Students who have not taken fresh admission may fill the exam form under "Late College Capacity".

However, first year failure students who have taken fresh admission in college have to fill the RME form first (with already registered option) before filling the exam form as per the regular students of first year. Student Id of these failure students of 1st year have to be deactivated as per past practice through "Active/Inactive" feature which is available under principal login, so that these students can register through RME portal as fresh.

Thank You
